

Binary Plus is a Patented Restricted Security Key System licensed by The Master Locksmiths Association of Australasia. Binary Plus is designed and manufactured in Australia by manufacturers who can meet the Association's standard of excellence.

Binary Plus is only available from locksmiths who have met the Association's standard of excellence and are licensed and bound by legal agreement to deal with Binary Plus products and duplicate Binary Plus keys.

Binary Plus keys can only be duplicated when you and/or your elected person authorise key duplication. The Master Locksmith will only duplicate keys to systems for which their locksmith company holds the owner's signature and records.

Binary Plus provides extra security and quality with picking and bump resistance. The cylinders have multiple profiles, side pins and springs for extended code usage and additional lock protection.

Nothing can replace the reliability of a mechanical key system. Mechanical locking systems are often installed in conjunction with an electronic locking systems for security, reliability and economic purposes. For these reasons mechanical override cylinders are always required for additional security and in case of an emergency.
