2000 SC Back

2200 Open Back

The BL2000 series is a range of fully mechanical pushbutton coded locks. The ergonomic design (originated by Borg, now imitated by many) and simple operating procedure ensures access for authorised personnel only.

Automatic locking until correct code is entered, anti-thrust latch plus over 8,000 different combinations to choose from provide greater security.

Easy to fit, (can be supplied with fittings to suit doors up to 80mm thick) and with all parts and fittings included it is ideal for low usage applications. See application guide.

All the internal components are chemically treated for extra strength and durability, which is something other manufacturers neglect. It also makes it suitable for fitment in many locations without maintenance.
