

EVVA is a world leader in producing innovative keying systems of the highest quality and is the first European cylinder manufacturer to become ISO9001 certified for quality and design. EVVA is Manufactured Exclusively in Vienna Austria.

EVVA DPS is a High Security Restricted Key System and is Australian Government SCEC Approved for Intruder Resistant Areas when installed into a SCEC Endorsed lock.

EVVA provides features that increase its security against illegal attacks. These features prevent illegal key duplication; they provide security against physical attacks and entry methods such as drilling, lock picking or lock bumping.

Nothing can replace the reliability of a mechanical key system. Mechanical locking systems are often installed in conjunction with an electronic locking systems for security, reliability and economic purposes. For these reasons mechanical override cylinders are always required for additional security and in case of an emergency.

EVVA DPS Features Include:

- \* Full Patent Protection
- \* Super Tough Nickel Silver Keys
- \* Anti Pick and Anti Bump Security
- \* Drill Resistant
- \* Unique Slider System with Control Bar and Side Bar
- \* Multi Profile Sidebars to Maximise Codes
- \* Cycle Tested to 100,000 Cycles
- \* Teflon Impregnated Nickel Silver Components for Continued High Performance
- \* Highest Standard for Corrosion and Fire Resistance
- \* Operates in the Most Extreme Environments Between -20 to 80 Degrees Celsius
